I went back and checked three 150-165 MHz scanner crystals pulled out of the box at random (at least 2 different manufacturers). All three were 9th overtone (oscillating at 16-17 MHz), and the difference between their fundamental and 1/9 of their marked frequency (assuming a

10.7 IF) was between 0.02 and 0.05%.

Have been away frim net due to illness.
lost last weeks mail to leeboo@ct.net
anybody comming back about equipment
I was looking for , please repeat message.
thanks much
Thank the good LORD for all that you have!!!

Hi Guys,

A while back I saw someone looking for some missing QST's for their
collection. Was it here or has my memory gone completely kaput????
